LinkedIn | GitHub

PROFESSIONAL SUMMARY

Motivated MCA graduate with a strong foundation in Java, Python, React.js, Node.js, and MongoDB. Interested in full-stack development, AI integration, and Large Language Models (LLMs). Built REST APIs and end-to-end projects, including an AI-powered mock interview platform that uses Claude AI. Quick learner, eager to contribute as a Full Stack Developer.

EDUCATION

Master of Computer Applications (MCA) 2024 – 2026
Pimpri Chinchwad University, Pune | CGPA: 7.78

Bachelor of Computer Applications (BCA) 2021 – 2024
Krishna College of Commerce and Science, Wathar | CGPA: 7.17

TECHNICAL SKILLS

Languages	Java, Python, JavaScript, HTML, CSS
Frameworks	React.js, Node.js, Express.js
Databases	MongoDB, MySQL, SQL
Tools	Git, GitHub, MS Word, Excel, PowerPoint
AI / LLMs	Claude AI, ChatGPT, Prompt Engineering, LLMs, Retrieval-Augmented Generation (RAG)
Concepts	OOP, REST APIs, SDLC Agil / Scrum

PROJECTS

InterviewBuddy – AI Mock Interview Platform
React.js, Node.js, Express.js, MongoDB, Claude AI, JWT

- Developed a full-stack AI-powered mock interview platform using React.js, Node.js, Express.js, and MongoDB, enabling users to practice role-specific technical interviews.
- Integrated Claude AI to analyze interview responses, generate 0–10 scores, personalized feedback, and ideal answers for improving interview performance.
- Implemented secure JWT-based authentication, user profiles, interview history, performance tracking, and a leaderboard system for monitoring user progress.
- Built an interactive dashboard with role/difficulty-based interview practice, analytics, gamification features, and resume-building functionality to provide an end-to-end interview preparation experience.

Real-Time Human Detection and Counting

Python, OpenCV, HOG (Histogram of Oriented Gradients), Computer Vision

- Developed a real-time human detection system using Python and OpenCV.
- Used the HOG-based pre-trained detector to identify humans from live camera/video.
- Processed video frames continuously for real-time detection.
- Applied image processing techniques for frame capture, detection, and visualization.
- The system can be useful for security monitoring and surveillance.

CERTIFICATIONS

- Web Technologies and Security – Coursera (March 2025)
- Introduction to OpenAI GPT Models – Infosys Springboard (March 2026)
- RHI104: Getting Started with Linux Fundamentals – Red Hat
